### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with the attorney Romi N. Bose on Tuesday, July 5, 2005.

The application has been amended as follows: In the Amendment filed on June 22, 2005 The amended title of the invention "Electrical Connector" has been changed to -- Electrical Connector with Terminal Rotation Prevention --

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: In combination with all the limitations recited in the independent claim, all the prior arts do not show an electrical connector comprising a plurality of conductive terminals, each terminal including a front contact end, a reinforcing box section rearwardly of the front contact end, and a rear terminating end with a crimp section. The box section and the crimp section have a polygonal cross-sectional configuration matching that of a respective through passage in an end cap to prevent rotation of the terminal. The through passages in the end cap is sufficiently long relative to the spacing between the polygonal reinforcing boxes and the polygonal crimp sections whereby the crimp sections remain located in the through passages in the end cap as the box sections pass out of the through passages into terminal-receiving passages in a housing of the electrical connector.
